

Kindly rewrite Claim 9 as follows:

*Sub B1* 9. *(Once Amended)* A client for coupling to a server in a network, the client comprising:  
5 an interface; a processor; and a sensor;  
wherein the interface is accessible by a server coupled to a network, whereby the processor may provide the network access to a signal generated by the sensor; the interface being classifiable in a set according to the signal, the interface receiving a network signal according to the classified set, the network signal being directed adaptively  
10 or dynamically according to a plurality of generated sensor signals associated with the  
classified set, the classification being contextually mapped with the network signals and  
identified in a group registry.

In Claim 18, please delete "the a" and replace with --to the--.

15

Kindly rewrite Claim 19 as follows:

*Sub B1* 19. *(Once Amended)* A networking method for coupling a plurality of nodes, the networking method comprising:  
receiving an attribute signal from a first node;  
20 transmitting the attribute signal to a second node for classifying the first node in a set according to the attribute signal;  
receiving a message signal from the second node; and

transmitting the message signal to one or more nodes classified in the set, the  
message signal being directed adaptively or dynamically according to a plurality of  
attribute signals associated with the classified set, the classification being contextually  
mapped with the attribute signals and identified in a group registry.
